DETAILED ACTION

Election/Restrictions

Claims 1 and 10 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 11, 12 and 14, directed to Species 2, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on May 18, 2007, is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

REASONS FOR ALLOWANCE

Claims 1-9, 31 and 33-38 are allowed.

The following is an Examiner's statement of reasons for allowance:

The image sensor element as recited in the claims of the instant invention fail to be taught by the prior art cited of interest.

For claims 1, 15 and 29, Komiya shows an image sensor element, but fails to teach the specific characteristic of the structure recited in the claims of the instant invention e.g. wherein the contacts (the first and second contacts and the “means for applying an electrical potential between the first and contacts”) are arranged one at each side.

For claims 19 and 22, Komiya shows an image sensor element, but fails to teach the specific method of operating the structure as recited in the claims of the instant invention e.g. wherein combination with the particular structure being utilized in the claims, the method including further the particular modulation operational process as recited in the claims.
